

JÜRGENS
Vertrauen verbindet - seit 1919
BALD

Jürgens and BALD - a moving development.

We, who work for Jürgens and BALD, treat every vehicle like our own. We give attention to our clients and staff as if they were family. We are one of Daimler AG's oldest contracting partners and our passion for cars is almost as old as cars themselves.

Thus, we have witnessed all innovations in the vehicle sector closely. We adapted knowledge and deep understanding for the relationship between our customers and their cars. A crucial requirement, which is not understood these days, and for us the basis and key qualification for a successful future.

We value our history, however, we develop the company permanently and reinvent it each and every day with the quality that made us big on one hand, and today's and tomorrow's innovations on the other.

It is due to this philosophy that we possess 12 facilities in NRW, Hessen and Rheinland-Pfalz with about 900 employees and a sales volume of € 550 million.

Those are impressive facts which certify our economical potential and passion. Furthermore, they show that we acquired honest confidence and an excellent reputation, thanks to service oriented action and interpersonal appreciation towards our clients and staff.

The good image that we show on the outside also reflects the inside of the company. Jürgens-Group is not only an attractive employer but also a sought-after training company. At the time being, there are 180 apprentices. In our region, we are one of the companies with the most apprentices.

We are pleased, that we find ourselves in the top flight in a nationwide ranking of Sales & Servicepartners of Daimler AG, especially because we got there, through something that we love to do on a daily basis.

As a third generation family business we are looking forward to earning your trust. This is a promise for service and skills, something we stand by our name.
